Summary

Data and Generative AI enthusiast with strong foundations in Python, machine learning, NLP, and deep learning. Hands-on experience building Retrieval-Augmented Generation (RAG) pipelines and LLM-based AI agents using LangChain and ChromaDB.

Skills

- **Programming:** Python, Java
- **Machine Learning & NLP:** Scikit-learn, NLP preprocessing (Tokenization, Stemming, Lemmatization, SpaCy, NLTK)
- **Deep Learning :** Neural Network architecture, Forward and Backward Propagation, Loss Functions, Gradient Descent, Weight & Bias Updates, Optimizers (SGD, Adam)
- **Generative AI:** Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents
- **Frameworks & Libraries:** LangChain (project-based), Flask, TensorFlow, PyTorch, Hugging Face, Gemini API
- **Vector Database:** ChromaDB, MongoDB
- **Data Analysis & Visualization:** NumPy, Pandas, Seaborn, Matplotlib, Excel, Power BI
- **Databases:** MySQL
- **Data Handling:** ETL concepts, Data Cleaning, Data Wrangling
- **Developer Tools:** Git, Jupyter Notebook, VS Code, Postman

Experience

Data Science Intern, One Stop.AI

Aug 2024 – Sep 2024

- Designed and deployed an ML-based text analysis system.
- Applied NLP preprocessing and feature engineering to improve model performance.
- Built Power BI dashboards to visualize trends and operational KPIs.

Data Analytics Intern, SlashMark

Sep 2024 – Nov 2024

- Performed data analysis and visualization on customer datasets.
- Extracted actionable insights to support data-driven decisions.
- Integrated analytical outputs into a Flask-based application.

Education

Dhanalakshmi Srinivasan University, Trichy

B.Tech in Artificial Intelligence and Data Science

July 2025

Percentage: 72

Narayana Junior College, Eluru

Intermediate (MPC)

June 2021

Percentage: 93

S.K Public School, Eluru

Secondary School of Certificate (SSC)

March 2019

Percentage: 91

Projects

Retrieval-Augmented Question Answering Agent (RAG)

Python, LangChain, MongoDB

- Designed and implemented a Retrieval-Augmented Generation (RAG) pipeline for domain-specific question answering.
- Built LangChain workflows integrating document loaders, text splitters, retrievers, and LLM chains.
- Generated transformer-based embeddings and stored them in MongoDB for semantic similarity search.
- Enhanced response relevance by augmenting LLM prompts with retrieved contextual documents.

AI Question Answering Agent

Python, Gemini API

- Built a single-agent LLM system capable of answering domain-specific queries.
- Implemented prompt-driven workflows and explored agent orchestration fundamentals.

Fraud Detection Analysis

Python, Scikit-learn, Pandas

- Analyzed transaction data to identify patterns associated with fraudulent activity.
- Built and evaluated machine learning models for classification tasks.

Certifications

Data Science Internship – One Stop.AI

Data Analytics – SlashMark

Analyzing and Visualizing Data with Power BI – Internshala

Data Analysis with Python – IBM

SQL and Relational Databases 101 – IBM

5 Days AI Agent Intensive Course – Google
