Summary —

Motivated and enthusiastic student with interest in software development and artificial intelligence. Skilled in developing web applications using Python, Flask, HTML, CSS, and JavaScript. Experience in building simple projects like student management systems and AI-based tools. Quick learner with good problem-solving skills and a strong interest in learning new technologies.

Skills

- **Programming:** Python, JavaScript
- **Web Technologies:** HTML, CSS
- **Frameworks:** Flask
- **Database:** SQLite
- **Developer Tools:** VS Code

Education

Aditya Institute of Technology and Management, Tekkali

Pursuing

B.Tech in Information Technology

Sri Chaitanya Junior College, Srikakulam

2024

Intermediate (MPC)

Percentage: 91

Sai Aditya School, Srikakulam

2022

SSC (10th Grade)

Percentage: 94.6

Projects

AI Study Assignment Web Application

Python, Flask, Sarvam API, JavaScript

- Built a web application that helps students learn and practice study topics.
- The system generates simple explanations and quizzes automatically using AI.
- Developed the backend using Flask to handle user requests and process data.
- Designed the frontend using HTML, CSS, and JavaScript to create a simple and user-friendly interface.
- Helps students understand study material better by providing explanations and practice questions.

Student Management System

Python, Flask, SQLite

- Developed a web-based application to store, manage, and update student information.
- Implemented features such as student registration, login, and viewing student details.
- Allowed students to edit or update their personal information in the system.
- Used Flask as the backend framework to handle requests and application logic.
- Used SQLite database to store student records securely.
- Designed simple web pages for interaction between users and the system.
